96-98

Dear President Bush,

Re: The telecommunication and Deregulation Act of 1996,
and our sagging economy.

It's now apparent that both our economy and the regulatory structure governing our telecommunication industry are in real trouble.

As I understand it, approximately one third of our economy is impacted by our telecommunications industry. In spite of the above 1996 Deregulation Act, and most likely, because of it, our government continues to micro-manage this industry in a manner that is truly un-American. Where we were once the envy of the world, we have now managed to cripple this industry including our local phone companies and their downstream equipment suppliers.

How is it that in America we can actually force our local phone companies or any company to sell it's product and/or services to competitors far below actual cost? I believe this is unconstitutional and is not the democratic form of government I grew up to love and know. Every company has a right to make a profit, however, small it may be.

Recently, I read an editorial in the Detroit News that appraised readers of this injustice. It stated that in Michigan, State Commissioners force SBC/Ameritech to sell local service to competitors (resellers) for a below cost figure of \$14.44 per month. It further stated that North Carolina commissioners using the same FCC directives determined that Bell South should wholesale their service for \$23.68 per month.

Astonished by this, I contacted the Michigan Public Service Commission (MPSC) questioning the wide discrepancy in whole sale rates. It was obvious to me that they were very anti-SBC/Ameritech and biased. The MPSC insisted that, although they "had not seen the article, that any such article must have been the work of SBC and not the Detroit News."

We have legislated this self-imposed destruction on ourselves and the downstream impact on our economy. This is not good old American competition, it's legislated false competition and devastation. Therefore, I pray that you and the FCC will take the necessary steps to immediately remove these anti-competitive, anti-American regulations on these local phone providers, and that most will survive.

REC'D WASHINGTON

SEP 11 11 50 AM '01

In view of the above, if it is determined that non-discriminatory regulation must remain, then we cannot have regulations from both the FCC and the States or we will have the same chaos we have now. I am not one, who usually believes in government oversight. However, in this case, it's mandatory that the FCC take charge by reducing regulations and establishing fair and universal guidelines/pricing to facilitate an expedient recovery. This is especially urgent in the world we live in since 9-11-01. We cannot afford to jeopardize our survival by continuing to destroy the communication system, we and the world depend on in these tremulous times.

Thanks in advance for your time and assistance in this most important matter.

Sincerely,
